Visited place name: Lothal city of the part of Harappain civilization& related museum

Location: Saragwala, Gujarat, India

Type: settlement

Founded: Approximately 3700 BC

Excavation date: 1955-1960

Management: Archaeological survey of India

Condition: ruined

Public access: yes

Visit started from the lothal museum there were many ancient things which were discovered from this city which was of the part of Harappa civilization such as different pots , weights, jewellery ,seal signs , stones and etc.

Then after they visited the town planning of lothal city which was discover between 1955-1960 by, how people about 5000 years ago were civilized and how they made their towns ,homes, street and etc.

And from which material they their walls, the bricks that have seen were totally different from which that we nowadays using its size much more.

People of Lothal made significant and often unique contributions to human civilization in the Indus era, in the field of city planning, Art, architecture, science, Engineering and etc.

visited the remaining part of lothal town as a civil engineering student ,and it was too intersting for me, because it was showing that 5000 –years ago how they were civilized people that even today's engineers plan the town base on the town plan planning of that time.
