Expert Session on Natural Language Processing

Organized by
Department of Computer Engineering,
And
Computer Society of India, Student Branch, GCET, Vallabh Vidyanagar

Event Name:	Expert Session on Natural Language Processing
Date:	27 th July, 2024
Venue:	GCET Seminar Hall
Time:	10:00 AM – 01:00 PM (Morning Session) 02:00 PM – 04:00 PM (Afternoon Session)
Faculty coordinators:	Prof. Hetal Gaudani and Prof. Vraj Hingu
No. of Participants:	136 (Morning Session) 56 (Afternoon Session)

The Computer Engineering Department, in collaboration with the Computer Society of India, Student Branch GCET, organized an expert session on "Natural Language Processing" on 27th July 2024.

Mr. Mohammed Husain Bohara, an Assistant Professor at Charotar University of Science and Technology, conducted the session, sharing his extensive knowledge and experience with the participants. The event saw active participation with a total of 136 participants in the morning session and 56 in the afternoon session.

The primary objective of this expert session was to provide students with an in-depth understanding of Large Language Models (LLMs), their quantization, fine-tuning, and various use cases, with hands-on demonstration.

Department of Computer Engineering
Computer Society of India, Student Branch, GCET, Vallabh Vidyanagar

The session commenced with an introduction and a formal welcome of Mr. Mohammed Husain Bohara, followed by Dr. Maulika Patel, Head of Department (HOD), Computer Engineering, presenting a floral bouquet as a token of welcome and respect. Dr. Patel then set the tone of the event with a few encouraging words, emphasizing the importance of NLP in modern technology.

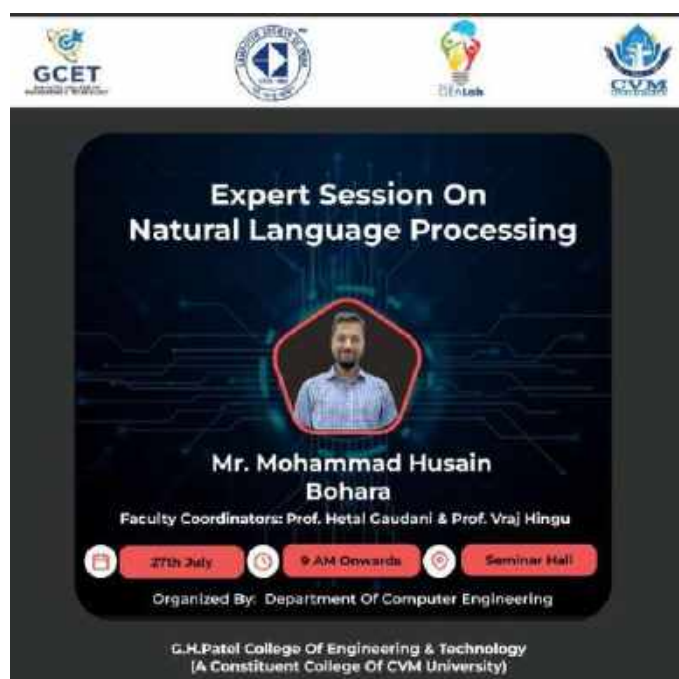

Mr. Bohara's talk covered several key topics, including an overview of Large Language Models (LLMs), techniques for quantization and fine-tuning of LLMs, use cases of LLMs in various domains, and detailed explanations of zero-shot, one-shot, and few-shot inferences, along with an in-depth discussion of LLM architecture and pipeline.

Following the presentation, the practical side of the course was introduced through two lab exercises. The first lab exercise involved the task of dialogue summarization using generative AI, where participants explored how input text affects the model output and performed prompt engineering to direct the task. This exercise included comparisons of zero-shot, one-shot, and few-shot inferences to understand and enhance the generative output of LLMs. In the second lab exercise, participants fine-tuned an existing LLM from Hugging Face for enhanced dialogue summarization using the FLAN-T5 model. The exercise involved full fine-tuning and Parameter Efficient Fine-Tuning (PEFT) approaches, with evaluation using ROUGE metrics.

The session concluded with an interactive Q&A session where students asked pertinent questions regarding NLP techniques, model fine-tuning, and practical applications. Mr. Bohara answered each query with detailed explanations, providing clarity and boosting the confidence of the participants.

The session was informative and enlightening, providing valuable insights into NLP and its applications. The event received positive feedback from both students and faculty members. Attendees appreciated the practical advice and the speaker's approachable demeanor. Many students expressed their eagerness to apply the concepts and techniques discussed during the session.
